---	--------------------

Skills & Tools

Python, UI/UX Design, HTML, CSS, VSCode, Figma, Pycharm, Ai Prompting

Project

Virtual Mouse Using Hand Gestures: this is a computer vision system that allows users to control the cursor and perform mouse actions using hand movements detected by a webcam.

Open-source SOC Platform: this is a tool for real-time threat monitoring, log analysis, and secure session management that works on multiple platforms.

Camdroid: this is a mobile app that turns your smartphone into a wireless webcam, streaming live video to a desktop receiver through QR code pairing and a Wi-Fi connection.

ScanMark: this is a mobile attendance app that uses QR code scanning, real-time tracking, and an appealing user interface to manage student profiles and track attendance effectively.

Certificate

Python & Django Avodha Institute	May 2024 – August 2024
